

INSTRUCTIONS FOR EMERGENCY CARE

- Medoff Medical is the consultative practice of Dr. Jeffrey Medoff focused on the health and wellness of your Digestive System, and the outpatient diagnosis and treatment of related disorders. Since this is a specialty practice you must have a family or primary care doctor.
- If you have a gastrointestinal problem you should first contact your primary care physician. Your doctor will determine whether or not referral to our office is appropriate. Their office will then arrange for you to be seen at Medoff Medical.
- If you feel that your problem is urgent and requires emergency care, then you should proceed directly to the closest emergency care facility for evaluation and treatment. Notify your primary care physician before or while en route to the ER, in order for them to be of assistance to you.
- Dr. Medoff will respond to the emergency physician if he is contacted. However, there is a possibility that Dr. Medoff will not be available. In this situation the emergency physician and/or your primary care physician will make a decision to bring in another gastroenterologist if necessary.

I have read the above instructions, understand them, have been given the opportunity to have all of my questions answered regarding this policy, and I have been given a personal copy to keep for future reference. Furthermore I understand that it is my responsibility to establish with a primary care physician, maintain this relationship, and to notify Dr. Medoff of any changes in this regard.
